

Taha Aliasgar Badami

Cybersecurity Analyst | Network Security Engineer

Pune, Maharashtra | +91-8482843350 | badamitab@gmail.com | LinkedIn: Taha-Badami

Professional Summary

Early-career IT Support and Cybersecurity professional with experience in desktop support, network troubleshooting, and security operations. Holds EC-Council certifications (CEH, CHFI) and CCNA, with hands-on HackTheBox labs covering vulnerability assessment, penetration testing, log monitoring, and endpoint security. Proven ability to maintain 99% uptime across 100+ workstations and resolve 70+ technical issues weekly with a 90% first-contact resolution rate.

Certifications

- **Computer Hacking Forensic Investigator (CHFI)** — EC-Council, 2026
- **Certified Ethical Hacker (CEH)** — EC-Council, 2025
- **Cisco Certified Network Associate (CCNA)** — Sysap Technologies, 2023

Technical Skills

Desktop & Hardware: Install, configure, and maintain desktops, laptops, printers, and peripherals; hardware diagnostics and repair coordination

Operating Systems: Windows (troubleshooting, patching, updates), Linux (Kali, Ubuntu), VMware, VirtualBox

Networking: TCP/IP, DNS, DHCP, LAN/Wi-Fi troubleshooting, Active Directory, user account and permissions management

Security Testing: Penetration Testing, Vulnerability Assessment, Threat Detection, Incident Response, Log Analysis

Security Tools: Nmap, Metasploit Framework, Wireshark, Burp Suite, IDS/IPS, Nessus, OpenVAS

Programming & Scripting: Python, SQL

Frameworks & Standards: OWASP Top 10, MITRE ATT&CK, CIA Triad

Work Experience

IT Support Engineer

Olympus Computers, Pune

Sep 2024 – Mar 2025

- Installed, configured, and maintained desktops, laptops, printers, and peripheral devices, achieving **99% uptime** across **100+ workstations**.
- Resolved **70+ weekly technical issues** involving OS errors (Windows/Linux), network faults, and hardware failures with a **90% first-contact resolution rate**.
- Managed user accounts, permissions, and Active Directory tasks to ensure secure and organised access control.
- Diagnosed hardware faults and coordinated repairs and replacements to minimise downtime.
- Ensured reliable LAN and Wi-Fi connectivity by troubleshooting network configuration and performance issues.
- Performed regular system updates, security patching, and preventive maintenance across the workstation fleet.

Projects

Penetration Testing Lab Environment

Tech Stack: VirtualBox, Kali Linux, Metasploitable, DVWA

Ongoing

- Built an isolated penetration testing lab with intentionally vulnerable machines to simulate real-world attack scenarios.
- Performed vulnerability assessments using **Nmap**, **Nessus**, and **OpenVAS**, documenting findings in structured reports.

- Monitored system logs and network traffic to detect and analyse suspicious activity during lab exercises.
- Practised exploitation techniques including SQL injection, XSS, privilege escalation, and post-exploitation in controlled environments and **Hack The Box**.

Secure Remote Administration Tool

Dec 2024 – Feb 2025

Tech Stack: Python, Socket Programming, Threading

- Built a secure remote administration tool for authorised Windows system management with multi-client support.
- Implemented authentication mechanisms and session logging to maintain audit trails for system access.
- Developed features for remote command execution, file transfer, and system monitoring aligned with endpoint security best practices.
- Gained expertise in socket programming, multithreading, secure coding practices, and network protocol design.

Student Management Portal (Full-Stack)

Jan 2025 – Feb 2025

Tech Stack: React, Tailwind CSS, REST API, JWT Authentication

- Built a Student Management Portal with full CRUD functionality and JWT-based authentication for secure role-based access.
- Implemented client-side validation for email, phone, PRN, and batch formats aligned with backend rules.
- Integrated Axios interceptors for centralised API handling and toast notifications for admin actions.

Smart Video Controller

Mar 2024 – Aug 2024

Tech Stack: Python, OpenCV, MediaPipe, Speech Recognition

- Developed a video control application using hand gestures and voice commands, achieving **92% gesture recognition accuracy**.
- Integrated speech recognition API for hands-free interaction, reducing user interaction time by 40%.
- Optimised frame processing to maintain **30 FPS** performance on mid-range hardware.

Education

Bachelor of Computer Applications (BCA) — Abeda Inamdar Senior College, Pune

2022 – 2025

CGPA: 8.4 / 10

Higher Secondary Certificate (HSC) — Maharashtra State Board

2022

Percentage: 62%

Secondary School Certificate (SSC) — Maharashtra State Board

2020

Percentage: 77%

Achievements

- Completed hands-on HackTheBox labs covering enumeration, privilege escalation, and basic lateral movement techniques.
- Developed a practical understanding of penetration testing workflows, from reconnaissance through to structured reporting.
- Created Python scripts to automate reconnaissance tasks and basic vulnerability checks during practice labs.
