

Taha Aliasgar Badami

DevOps Engineer — Linux, Infrastructure & Automation

Pune, Maharashtra | +91-8482843350 | badamitab@gmail.com | LinkedIn: Taha-Badami

Professional Summary

Entry-level engineer with a strong infrastructure and systems foundation, built on Linux administration, virtualization (VMware, VirtualBox), networking, and Python scripting. Experienced in maintaining up-time and reliability across a 100+ workstation environment through proactive patching, monitoring, and troubleshooting. Comfortable with Git, Docker, CI/CD workflows (GitHub Actions, GitLab CI), and AWS, with a security-conscious approach drawn from CEH/CHFI certifications.

Technical Skills

Linux & Systems: Linux (Kali, Ubuntu), Windows Server basics, VMware, VirtualBox, System Patching & Maintenance

Networking: TCP/IP, DNS, DHCP, LAN/Wi-Fi Troubleshooting, Active Directory

Scripting & Version Control: Python, Git, SQL

Containers: Docker Fundamentals

CI/CD & Cloud: GitHub Actions, GitLab CI, AWS

Monitoring & Troubleshooting: Log Analysis, System/Network Monitoring, Incident Investigation

Work Experience

IT Support Engineer — Olympus Computers, Pune

Sep 2024 – Mar 2025

- Troubleshoot LAN/Wi-Fi connectivity and diagnosed network faults across TCP/IP, DNS, and DHCP configurations to maintain reliable connectivity for 100+ workstations.
- Managed user accounts, permissions, and Active Directory configuration, including basic network access control and group policy tasks.
- Investigated and resolved 70+ weekly issues spanning OS errors, network faults, and hardware failures with a 90% first-contact resolution rate.
- Performed regular system updates and security patching across the fleet, maintaining 99% uptime through proactive monitoring and preventive maintenance.

Projects

Penetration Testing Lab Environment

Ongoing

Tech Stack: VirtualBox, Kali Linux, Metasploitable, DVWA

- Built and provisioned an isolated multi-machine lab using VirtualBox, configuring networked virtual machines to simulate real-world infrastructure.
- Monitored system logs and network traffic to detect and analyze suspicious activity, and performed vulnerability assessments using Nmap, Nessus, and OpenVAS, documenting findings in structured reports.

Secure Remote Administration Tool

Dec 2024 – Feb 2025

Tech Stack: Python, Socket Programming, Threading

- Built a secure remote administration tool for authorized Windows system management with multi-client support and remote command execution.
- Implemented authentication mechanisms and session logging to maintain audit trails, gaining hands-on experience with socket programming, multithreading, and network protocol design — foundational skills for infrastructure automation and tooling.

Education

Bachelor of Computer Applications (BCA) — Abeda Inamdar Senior College, Pune 2022 – 2025
CGPA: 8.4 / 10

Higher Secondary Certificate (HSC) — Maharashtra State Board, 62% 2022

Secondary School Certificate (SSC) — Maharashtra State Board, 77% 2020

Certifications

Cisco Certified Network Associate (CCNA) — Sysap Technologies 2023

Certified Ethical Hacker (CEH) — EC-Council 2025

Computer Hacking Forensic Investigator (CHFI) — EC-Council 2026
