

Taha Aliasgar Badami

Digital Forensics & Cyber Investigations Intern

Pune, Maharashtra | +91-8482843350 | badamitab@gmail.com | LinkedIn: Taha-Badami

Professional Summary

Cybersecurity fresher certified as a Computer Hacking Forensic Investigator (CHFI), with hands-on experience in structured vulnerability assessment, log analysis, and evidence-style documentation from a self-built penetration testing lab. Co-authored applied research on deepfake image detection, developing direct experience analyzing digital media artifacts to distinguish authentic from manipulated content. Detail-oriented, with strong written documentation habits and a genuine interest in digital forensics and technical investigation work.

Technical Skills

Digital Forensics Foundations: Evidence Handling & Chain of Custody Concepts (CHFI), Log & Event Analysis, Media/Image Forensic Analysis

Security Testing: Vulnerability Assessment, Penetration Testing, Threat Detection

Security Tools: Nmap, Nessus, Metasploit Framework, Wireshark, Burp Suite, OpenVAS

Scripting & Documentation: Python, Structured Technical Reporting

Standards & Frameworks: OWASP Top 10, MITRE ATT&CK, CIA Triad

Work Experience

IT Support Engineer — Olympus Computers, Pune

Sep 2024 – Sep 2025

- Investigated and resolved 70+ weekly technical issues spanning OS, network, and hardware faults with a 90% first-contact resolution rate.
- Maintained 99% uptime across 100+ workstations through proactive monitoring and preventive maintenance.
- Documented issues, resolutions, and recurring patterns to support consistency and faster diagnosis.

Research

Deepfake Image Detection — Hybrid Dual-Branch CNN (Co-Author)

Spatial + Frequency-Domain Analysis, Confidence-Based Filtering

- Co-authored applied research analyzing spatial and frequency-domain artifacts to distinguish authentic images from AI-manipulated media, reaching 83–84% validation accuracy.
- Designed a confidence-based filtering mechanism to flag low-certainty classifications for further review, mirroring investigative workflows that separate high-confidence findings from cases needing deeper analysis.

Projects

Penetration Testing Lab Environment

Ongoing

Tech Stack: VirtualBox, Kali Linux, Metasploitable, DVWA

- Performed vulnerability assessments using Nmap, Nessus, and OpenVAS, documenting findings in structured, audit-style reports.
- Monitored system logs and network traffic to detect and analyze suspicious activity, translating technical findings into clear written summaries.
- Wrote small Python scripts to automate reconnaissance and basic checks during lab exercises.

Secure Remote Administration Tool

Dec 2024 – Feb 2025

Tech Stack: Python, Socket Programming, Threading

- Built a secure remote administration tool for authorized Windows system management with multi-client support and remote command execution.
- Implemented authentication mechanisms and session logging to maintain audit trails for system access, gaining hands-on experience with network protocol design and secure coding practices.

Education

Bachelor of Computer Applications (BCA) — Abeda Inamdar Senior College, Pune 2022 – 2025

CGPA: 8.4 / 10 | HSC — Maharashtra State Board, 62% (2022) | SSC — Maharashtra State Board, 77% (2020)

Certifications

Computer Hacking Forensic Investigator (CHFI) — EC-Council 2026

Certified Ethical Hacker (CEH) — EC-Council 2025

Cisco Certified Network Associate (CCNA) — Sysap Technologies 2023
