

Taha Aliasgar Badami

Cyber Security Analyst — Incident Response & Digital Forensics

Pune, Maharashtra | +91-8482843350 | badamitab@gmail.com | LinkedIn: Taha-Badami

Professional Summary

Cyber security analyst with a Computer Hacking Forensic Investigator (CHFI) certification and hands-on lab experience in log analysis, vulnerability assessment, and monitoring/escalation workflows. Co-authored applied research on deepfake image detection, building direct experience analyzing media artifacts to distinguish authentic from manipulated content. Brings a structured, evidence-driven approach to triaging and investigating security events, with a foundation in incident response and forensic principles from CHFI coursework and an IT support background handling high-volume monitoring and escalation within SLA.

Certifications

Computer Hacking Forensic Investigator (CHFI) — EC-Council, 2026 | Certified Ethical Hacker (CEH) — EC-Council, 2025 | Cisco Certified Network Associate (CCNA) — Sysap Technologies, 2023

Technical Skills

Incident Response & Forensics: Evidence Handling & Chain of Custody (CHFI), Log & Event Analysis, Media/Image Forensic Analysis, Incident Documentation & Escalation

Monitoring & Detection: IDS/IPS, Alert Triage, Network Traffic Analysis, SIEM Concepts

Security Testing: Vulnerability Assessment, Penetration Testing, Threat Detection

Security Tools: Wireshark, Nmap, Nessus, Metasploit Framework, Burp Suite

Operating Systems & Scripting: Linux (Kali/Ubuntu), Windows, Python, SQL, Git

Frameworks & Standards: MITRE ATT&CK, OWASP Top 10, CIA Triad

Work Experience

Security Analyst L1 — Olympus Computers, Pune

Sep 2024 – Sep 2025

- Monitored 100+ endpoint workstations for hardware, OS, and network anomalies, investigating and resolving 70+ weekly incidents with a 90% first-contact resolution rate.
- Reviewed system and event logs to identify root causes of recurring issues, escalating unresolved cases through defined support channels — workflow directly analogous to L1 alert triage and escalation.
- Documented incident details, resolution steps, and recurring patterns to strengthen the internal knowledge base and support consistent triage, sustaining 99% uptime across the environment.

Research

Deepfake Image Detection — Hybrid Dual-Branch CNN (Co-Author)

Spatial + Frequency-Domain Analysis, Confidence-Based Filtering

- Co-authored applied research analyzing spatial and frequency-domain artifacts to distinguish authentic images from AI-manipulated media, reaching 83–84% validation accuracy.
- Designed a confidence-based filtering mechanism to flag low-certainty classifications for further review, mirroring forensic-analysis workflows that separate high-confidence findings from cases needing escalation.
- Trained and iteratively debugged the model under constrained hardware (4GB VRAM), resolving data-loading, memory, and signal-processing issues.

Projects

Penetration Testing Lab Environment

Ongoing

Tech Stack: VirtualBox, Kali Linux, Metasploitable, DVWA

- Built an isolated lab with multiple intentionally vulnerable machines for hands-on detection and exploitation practice.
- Performed vulnerability assessments using Nmap, Nessus, and OpenVAS; practiced identifying and analyzing attack indicators (SQL injection, XSS, privilege escalation, post-exploitation) across controlled lab environments and Hack The Box.

Secure Remote Administration Tool

Dec 2024 – Feb 2025

Tech Stack: Python, Socket Programming, Threading

- Built a secure remote administration tool for authorized Windows system management with multi-client support, implementing authentication and session logging to maintain audit trails — reinforcing log-analysis and monitoring fundamentals.

Education

Bachelor of Computer Applications (BCA) — Abeda Inamdar Senior College, Pune

2022 – 2025

CGPA: 8.4 / 10

Higher Secondary Certificate (HSC) — Maharashtra State Board, 62%

2022

Secondary School Certificate (SSC) — Maharashtra State Board, 77%

2020
