

Taha Aliasgar Badami

System Engineer Trainee Candidate

Pune, Maharashtra | +91-8482843350 | badamitab@gmail.com | [linkedin.com/in/Taha-Badami](https://www.linkedin.com/in/Taha-Badami)

Professional Summary

BCA graduate and current MCA student with hands-on experience in IT support, system troubleshooting, and end-user technical assistance across Windows and Linux environments. Working knowledge of networking fundamentals, Active Directory, and programming with Python and SQL. Interested in application support, enterprise systems, and infrastructure engineering roles.

Technical Skills

Programming	Python, SQL, C
Operating Systems	Windows, Linux (Ubuntu, Kali)
Networking	TCP/IP, DNS, DHCP, LAN/Wi-Fi Troubleshooting
System Administration	Active Directory, User & Permission Management, Windows Installation & Patching, Hardware/Software Troubleshooting
Tools	Git, Wireshark, Nmap, VMware, VirtualBox
Core Concepts	OOP, DBMS, Computer Networks, Operating Systems, SDLC, Information Security

Work Experience

IT Support Engineer

Sep 2024 – Mar 2025

Olympus Computers, Pune

- Configured and maintained desktops, laptops, printers, and peripherals, supporting 100+ workstations with 99% uptime.
- Troubleshoot Windows OS issues, network connectivity faults, and hardware failures, resolving 70+ issues weekly with a 90% first-contact resolution rate.
- Managed user accounts, permissions, and Active Directory tasks to maintain secure, organized access control.
- Diagnosed hardware faults and coordinated repairs and replacements to minimize downtime.
- Installed software, performed system updates and security patching, and carried out preventive maintenance across the workstation fleet.
- Provided end-user technical support for OS, network, and hardware-related queries.

Projects

Secure Remote Administration Tool

Python, Socket Programming, Threading

- Built a client-server remote system administration tool in Python using socket programming, supporting multiple concurrent clients through multithreading.
- Implemented authentication and session logging, along with remote command execution, file transfer, and system monitoring features for authorized Windows system management.
- Applied secure coding practices and network protocol design principles while developing client-server communication.

Student Management Portal – Frontend

React, Tailwind CSS, REST API, JWT

- Built the frontend of a student management system in React, integrating existing backend REST APIs for CRUD operations.
- Integrated JWT-based authentication and implemented role-based UI functionality for secure, role-specific access.
- Implemented client-side form validation for fields such as email, phone, PRN, and batch formats, aligned with backend rules.
- Used Axios interceptors for centralized API request handling and added toast notifications for admin actions.

IoT-Based Automatic Liquid Medicine Dispenser

ESP32, Embedded C, OLED

- Designed a dose-selection and dispensing system using an ESP32 microcontroller, calibrated peristaltic pump, and OLED display for real-time status feedback.
- Implemented a push-button interface allowing dose selection between 2 mL and 20 mL in 0.5 mL increments.
- Calculated pump run-time from a calibration constant to control dispensing duration via an L298N motor driver.

Education

Master of Computer Applications (MCA)

MIT World Peace University (MIT-WPU), Pune

Currently Pursuing

Bachelor of Computer Applications (BCA)

Abeda Inamdar Senior College, Pune

2022 – 2025

CGPA: 8.4 / 10

Higher Secondary Certificate (HSC)

Maharashtra State Board

2022

62%

Secondary School Certificate (SSC)

Maharashtra State Board

2020

77%

Certifications

- Cisco Certified Network Associate (CCNA) – Certification, Cisco (via Sysap Technologies training), 2023
- Certified Ethical Hacker (CEH) – Certification, EC-Council, 2025
- Computer Hacking Forensic Investigator (CHFI) – Certification, EC-Council, 2026
