

Taha Aliasgar Badami

Cybersecurity Analyst | Network Security Engineer

Pune, Maharashtra | +91-8482843350 | badamitab@gmail.com | LinkedIn: Taha-Badami

Professional Summary

Early-career cybersecurity professional with experience building React-based interfaces, integrating REST APIs, and supporting IT infrastructure. Leverages EC-Council certifications (CEH, CHFI) and hands-on HackTheBox labs to apply secure coding, networking, and forensic practices to real-world projects and environments.

Certifications

- Computer Hacking Forensic Investigator (CHFI) — EC-Council, 2026
- Certified Ethical Hacker (CEH) — EC-Council, 2025
- Cisco Certified Network Associate (CCNA) — Sysap Technologies, 2023

Technical Skills

Security Testing: Penetration Testing, Vulnerability Assessment, Threat Detection, Incident Response, Log Analysis

Security Tools: Nmap, Metasploit Framework, Wireshark, Burp Suite, IDS/IPS, Nessus

Programming & Scripting: Python, SQL

Operating Systems & Tools: Linux (Kali/Ubuntu), VMware, Git

Frameworks & Standards: OWASP Top 10, MITRE ATT&CK, CIA Triad

Work Experience

IT Support Engineer — Olympus Computers, Pune

Sep 2024 – Mar 2025

- Provided technical support for desktops, laptops, and peripheral devices, resolving hardware and software issues for end users.
- Configured and maintained hardware and OS environments with 99% uptime across 100+ workstations.
- Resolved 70+ weekly technical issues involving networks, operating systems, and end-user devices with a 90% first-contact resolution rate.

Projects

Student Management Portal (Full-Stack)

Jan 2025 – Feb 2025

Tech Stack: React, Tailwind CSS, REST API, JWT Authentication

- Built a Student Management Portal with full CRUD functionality and advanced filtering by school, department, programme, and batch.
- Implemented dynamic React forms with REST API-driven dropdowns to maintain data consistency.
- Added client-side validation for email, phone, PRN, and batch formats aligned with backend rules.
- Integrated JWT-based authentication, Axios interceptors for centralized API handling, and toast notifications for admin actions.

Smart Video Controller

Mar 2024 – Aug 2024

Tech Stack: Python, OpenCV, MediaPipe, Speech Recognition

- Developed a video control application using hand gestures and voice commands, achieving 92% gesture recognition accuracy.
- Implemented OpenCV and MediaPipe gesture models for real-time navigation, playback control, and volume adjustment.

- Integrated speech recognition API for hands-free interaction, reducing user interaction time by 40%.
- Optimized frame processing to maintain 30 FPS performance on mid-range hardware.

Secure Remote Administration Tool

Dec 2024 – Feb 2025

Tech Stack: Python, Socket Programming, Threading

- Built a secure remote administration tool for authorized Windows system management with multi-client support.
- Implemented authentication mechanisms and session logging to maintain audit trails for system access.
- Developed features for remote command execution, file transfer, and system monitoring capabilities.
- Gained expertise in socket programming, multithreading, secure coding practices, and network protocol design.

Penetration Testing Lab Environment

Ongoing

Tech Stack: VirtualBox, Kali Linux, Metasploitable, DVWA

- Built an isolated penetration testing lab with multiple intentionally vulnerable machines for hands-on security practice.
- Performed vulnerability assessments using tools such as Nmap, Nessus, and OpenVAS, documenting findings in structured reports.
- Practiced exploitation techniques including SQL injection, XSS, privilege escalation, and post-exploitation in controlled lab environments and Hack The Box.

Education

Bachelor of Computer Applications (BCA) — Abeda Inamdar Senior College, Pune *2022 – 2025*
CGPA: 8.4 / 10

Higher Secondary Certificate (HSC) — Maharashtra State Board *2022*
Percentage: 62%

Secondary School Certificate (SSC) — Maharashtra State Board *2020*
Percentage: 77%

Achievements

- Gained hands-on experience in enumeration, privilege escalation, and basic lateral movement through repeated lab-based practice.
- Developed a practical understanding of penetration testing workflows, from reconnaissance to reporting.
- Created small Python scripts to automate reconnaissance and basic vulnerability checks during practice labs.
